

A. Shot locations for geophone at 3800 meters below rig floor

B. Shot locations for geophone at 4200 meters below rig floor

C. Shot locations for OBHs only

Figure 1. Shot locations relative to the borehole (crossed lines) for the shallow geophone position and OBHs (A), for the deep geophone position and OBHs (B), and for the OBHs by themselves (C). The spreading direction in the area is north-south.
